Bihar E-Waste Management Scorecard

Status Report — July 2026

1. Purpose

This report summarizes the Bihar E-Waste Management Tracker, a 100-point scorecard built on the E-Waste (Management) Rules, 2022 (CPCB, India), covering generation, collection, formal recycling, regulatory compliance, informal-sector integration, environmental/health safeguards, and awareness outreach across ten major Bihar districts.

2. Overall Score

Bihar's current composite score is 56.4 / 100 — "Needs Improvement." The state performs strongly on formal recycling capacity and regulatory compliance in the sample data, but is held back by weak informal-sector integration and awareness outreach, both scoring near zero.

#	Category	Weight	Score Earned
1	Generation & Inventory	15	3.0
2	Collection Performance	20	7.9
3	Formal Recycling & Treatment	20	20.0
4	Regulatory Compliance	15	15.0
5	Informal Sector Integration	10	0.0
6	Environmental & Health Safeguards	10	10.0
7	Awareness & Outreach	10	0.5
	TOTAL	100	56.4

3. Generation & Collection Snapshot

Generation figures are illustrative estimates (0.30 kg/person/year, Census 2011 populations) pending actual CPCB/SPCB inventory data. Collection rates are placeholder values showing the pattern the live tracker will surface once real district data is entered.

District	Population	Est. Generated (kg)	Est. Collected (kg)	Collection Rate
Patna	5,838,465	1,751,500	735,600	42%
Muzaffarpur	4,801,062	1,440,300	446,500	31%
Gaya	4,391,418	1,317,400	368,900	28%
Saran	3,951,862	1,185,600	296,400	25%
Darbhanga	3,937,385	1,181,200	354,400	30%
Purnia	3,264,619	979,400	215,500	22%
Bhagalpur	3,037,766	911,300	246,100	27%
Begusarai	2,970,541	891,200	213,900	24%
Nalanda	2,877,653	863,300	284,900	33%
Munger	1,367,765	410,300	82,100	20%
State Total	36,438,536	10,931,500	3,244,300	30%

4. Key Observations

- Collection performance (39.5% of generated waste) falls short of the 100% EPR benchmark, dragging down an otherwise strong recycling score.
- Formal recycling infrastructure appears to exceed reported collection volumes in the sample — a sign the input data needs district-level verification rather than a single state-wide recycler entry.

- Informal-sector hotspots are not yet being tracked for formalization or worker registration — this category currently contributes 0 of its available 10 points.
- Awareness and outreach programs are logged for only one district; scaling campaigns statewide is the fastest lever to raise the score.

5. Recommendations

- Replace illustrative generation/collection figures with verified district-level records from Bihar State Pollution Control Board (SPCB) and urban local bodies.
- Expand the Recycling Infrastructure and Compliance Tracker sheets to list every CPCB/SPCB-authorized recycler and registered EPR entity actually operating in Bihar.
- Prioritize informal-sector formalization drives in high-population districts (Patna, Muzaffarpur, Gaya) where hotspot activity is likely concentrated.
- Set district-specific awareness and collection-drive targets on the Scorecard sheet to track quarter-on-quarter progress.

6. Limitations

All generation, collection, and district figures in this version are illustrative placeholders for demonstration purposes only. They should be replaced with verified state data before this scorecard is used for planning or reporting.
